FOR IMMEDIATE RELEASE

R+B Sten-Tel Partners with Millennium Informatics to Offer Healthcare Information Solutions

Doylestown, PA – November 5, 2009 – R+B Sten-Tel has entered into an agreement with Millennium Informatics to offer Healthcare Information Technology to the healthcare community. R+B Sten-Tel will offer these services through Millennium Informatics in Delaware, Maryland, New Jersey and Pennsylvania. R+B Sten-Tel and Millennium will work with physician practices to access the incentives proposed in the American Reinvestment and Recovery Act (ARRA) and the HITECH Act which offers up to \$44,000 per clinician who adopts an Electronic Medical Records (EMR) system and meets the requirement to achieve meaningful use.

Millennium Informatics is a healthcare information technology Systems Integration firm that brings together diverse technology applications and service offerings that transform the healthcare system so that it delivers patient-centered, value-driven care to the healthcare community. *Millennium takes a "best of breed" approach to application and services selection while ensuring a positive workflow experience for all users.*

Millennium Informatics has an exclusive relationship with USA Managed Care Organization (USAMCO) to provide USAMCO provider members with health information technology solutions. USAMCO is the nation's largest, most comprehensive, privately-held Preferred Provider Organization with over 400,000 individual provider members nationwide. Through esteemed panels of preferred providers, USAMCO offers innovative alternatives to traditional group health and workers' compensation medical benefits. With a distinct freedom of choice flexibility and a 100% user-friendly platform, USAMCO provides sound solutions to its provider members through a portfolio of uniquely client-drive integrated options focused on the seamless blend of quality care and cost containment. www.usamco.com

R+B Sten-Tel through Millennium will help USAMCO provider members address state and federal mandates to automate patient records. Millennium helps physicians navigate through the EMR maze and, when the right solution is selected, make certain the price is right, the solution is properly implemented and actually used. One of the many benefits of the EMR solution is its patient portal and electronic prescribing tool. The portal allows patients to complete their intake forms prior to their appointment, saving time for both the patients and physician. Having the intake form automatically populate the patient's chart eliminates double data entry, saving the practice countless hours. Millennium also provides solutions to USAMCO's hospitals, Independent Physician Associations (IPA's) to form the basis of early Health Information Exchanges (HIE's). Additional specialized solutions include hematology/oncology, pediatric rehabilitation, cardiology and imaging.

Since 1993 R+B Sten-Tel has served the medical community by meeting the documentation and health information management needs of clients nationwide. Through a broad network of technology partnerships, R+B Sten-Tel takes a consultative approach recommending solutions tailored to your organization. You can trust R+B Sten-Tel's comprehensive and customizable solutions to meet diverse needs – from [Transcription Services](#) integrated with Voice Recognition technology to [EMR](#) and Practice Management systems.
