

SIMPLIFYING HEALTH INFORMATION MANAGEMENT

“Easy to use as well as convenient for the doctors to dictate from anywhere. The turn-around time is fabulous. We are very happy with our choice of R+B Sten-Tel and in fact have referred associates to them.”

- A large Gastroenterology Practice based in Philadelphia

Since 1993 R+B Sten-Tel has served the medical community by meeting the documentation and health information management needs of clients nationwide. Through a broad network of technology partners, R+B Sten-Tel takes a consultative approach – recommending solutions tailored to your organization.

THE ANSWER TO EMR USABILITY CHALLENGES

According to a survey conducted by the *New England Journal of Medicine* only 4% of respondents have a fully functional EMR (with order-entry and clinical decision support capabilities) and 13% have a basic system. Cost and usability top the list of reasons clinicians resist adoption.

EntriPoint™ is R+B Sten-Tel's solution to EMR usability issues. R+B Sten-Tel's transcription portal reduces time spent documenting patient encounters, consults and assessments by supporting narrative dictation with results delivered directly into your EMR/EHR. This affords clinicians more time and intimacy for quality patient care, leaving the clerical work for R+B Sten-Tel's trained EMR transcriptionists.

THE EMR SELECTION QUANDARY

Smartscribes™ is for the clinician who wants to reduce the financial risk and worry linked with selecting the right EMR. R+B Sten-Tel offers **Nightingale On Demand**, a leading CCHIT certified ambulatory EMR, with no licensing costs. Enjoy the benefits of a fully hosted, internet accessible EMR with the convenience of high quality transcription. Maintain peace of mind knowing these cumulative patient records are completely transferrable.
