

SIMPLIFYING HEALTH INFORMATION MANAGEMENT

“I’ve been extremely pleased with the prompt and courteous customer service that R+B Sten-Tel has provided our agency. It’s nice to know that there are companies that truly stand behind their word. It has been a pleasure working with the R+B Sten-Tel staff.”

- Program Director, County Department of Human Services

Since 1993 R+B Sten-Tel has served the medical community by meeting the documentation and health information management needs of clients nationwide. Through a broad network of technology partners, R+B Sten-Tel takes a consultative approach – recommending solutions tailored to your organization.

COMPREHENSIVE TRANSCRIPTION SERVICES

R+B Sten-Tel’s patented workflow technology harnesses the power of the web to simplify transcription, customize turnaround, provide secure access, and improve accuracy.

- + Infinite voice capture options.
- + Anywhere, anytime access.
- + Integrated speech recognition engine.

ENTRIPOINT™

Combines R+B Sten-Tel’s transcription services with your existing EMR/EHR technology for complete integration.

- + Document encounters using narrative dictation.
- + Both narrative and structured sections delivered directly into EMR/EHR.
- + Significantly reduces time spent entering data.
- + Produces a more complete, detailed record.

NIGHTINGALE SMARTSCRIBES

Physicians dictate directly into one of North America's most advanced CCHIT Certified EMRs. Combines the power of fully-hosted, internet accessible Nightingale On Demand with the convenience of high quality transcription.

- + Low EMR entry cost.
- + Faster workflow and clinical documentation.
- + Template driven.
- + Records delivered in structured format.

NIGHTINGALE ON DEMAND (EMR)

All you need is an internet connection for secure access to a fully integrated Electronic Medical Records (EMR) system. No need to invest in or worry about software, hardware, security or back-ups. This fast and easy-to-use service is fully tailored to your needs.

- + Secure access anytime, anywhere.
- + Electronic prescription and labs.
- + Communicate with patients and peers.
- + Personalize your workflow.

INTERFACE CAPABILITIES

R+B Sten-Tel utilizes the Interfix Enterprise Development tool kit which allows interfacing with most HIS/EMRs, including virtually all HL7 based systems.

- + Supports bi-directional interfacing.
- + Voice capture system integration.
- + Reduces overall implementation time.

SCANNING AND DOCUMENT MANAGEMENT SOLUTIONS

Go paperless to streamline your office operations, improve decision support and save money through greater efficiencies.

- + Immediate access to important data.
- + Improved customer service
- + Operating cost reduction
